**Subject:** Call for Applications: 7th International Summer School on Technology Transfer in Life Sciences

Dear Sir or Madam,  
 We are happy to announce that the call for applications for the 7<sup>th</sup> International Summer School on Technology Transfer in Life Sciences in Dresden is now open.  
 For more information and to submit your application, please visit: [www.summerschool-dresden.de](http://www.summerschool-dresden.de)

Thanks to the success of the previous six International Summer Schools on Technology Transfer in Life Sciences from 2013 to 2018 and the generally positive feedback from participants and lecturers, the **Medical Faculty of TU Dresden** has established the summer school as an annual event. The programme is practice-oriented and allows participants to develop their own potential research ideas and technologies towards commercialisation. During one week they will gain knowledge on technology transfer from experts in the fields of technology evaluation, patenting, licensing, and spin-off development. To complement the programme, they will also be trained in how to pitch in front of potential investors, and be sensitized on important pitfalls when approaching the industry. The summer school will close with a mock pitch, in which all projects developed during the week will be presented in front of an expert jury.

The summer school will take place in Dresden from **16<sup>th</sup> September – 20<sup>th</sup> September 2019 with the kind support of external experts on technology transfer.**

The **online application** form is open **until 23<sup>rd</sup> June**. All complete applications submitted until the deadline will be taken into consideration by the selection committee. Participants will be chosen based on their motivation and background. A positive attitude towards technology transfer is a key requirement and ideally, applicants have already identified a potential project within their field of research. Please note that due to funding regulations, the summer school addresses only PhD students, postdocs, and group leaders.

**Participation fees do not apply**, as the Summer School is funded by the Excellence Initiative of the German Federal and State Governments and part of TU Dresden's Institutional Strategy.

We would be grateful if you could advertise this opportunity within your institutions and networks again! Please find a prepared text at the end of this email as well as a link to download posters to be printed and distributed within your institutions.

Kind regards,  
Maike Heber and Nadine Schmieder-Galfe

Dear researchers,

**Would you like to check the commercial potential of your research? Do you think you already have the Next Generation Technology or Service in Life Sciences? Then get the expertise how to commercialize it!**

Apply for the **International Summer School on Technology Transfer in Life Sciences**, taking place **16<sup>th</sup> September to 20<sup>th</sup> September 2019** in **Dresden/Germany!**

During this one-week training programme, you will learn how to get your research ideas from the lab to the market. You will get introduced to the basics of technology transfer, enabling you to identify the commercial potential within your research, how to patent and license it, how to develop a spin-off, and how to fund all these activities. You will learn about important pitfalls when approaching industry and get expert coaching on pitching in front of potential investors, including a mock-pitch in front of a real expert investor panel!

**Participation is free of charge** and accommodation costs for all selected candidates will be covered! Interested? Then apply by **23<sup>rd</sup> June, 2019** latest using the online application form on our website:

[www.summerschool-dresden.de](http://www.summerschool-dresden.de)

Good luck!

Kind regards  
Maike Heber
